🎮 Coromon: Smartest Ways to Spend Your Coins

Managing your coins the right way in Coromon can level up your game—literally. This step-by-step guide shows you how to get the most value from every coin, from upgrading your gear to using smart discounts and stocking up like a pro.

Step 1 : Prioritize Your Upgrades

Before you start spending on items, make sure your build is fully upgraded. This gives you long-term advantages in battles and resource gathering.

Focus on:

- Gear : Max out your weapons, armor, and utility tools.
- Core Facilities : Upgrade things like healing efficiency and item-carrying capacity.

Step 2 : Sell Off the Junk

Time to clean out your inventory. Sell anything you don't really need and keep only the essentials:

Keep These:

- Platinum Spinners – Best for catching rare Coromon.
- Gems – Valuable for trading and crafting.
- Potentiflator Tokens – Boosts potential stats.

This helps you build up your coin reserve for important purchases later.

Step 3: Bulk Buy When you really need to

Once you have enough coins, wait for the right time to buy - ideally when there's a big discount coupon available.

Tips:

- Look for bulk deals - offer up to 75% off.
- Stock up on healing items, powerful spinner

Step 4: Use Your Discounts Wisely

Don't forget to apply any available discounts before checkout. These savings add up fast and let you stretch your coins further.

Example:

I used a 75% discount and stocked up on everything I needed—without breaking the bank.

Final Tips

1. Upgrade first — Gear and facilities make everything else easier.
2. Sell smart — Ditch low-tier items you won't use.
3. Buy big, buy cheap — Use bulk discounts whenever possible.
4. Hold onto the essentials — Especially spinners, gems, and tokens.

🌟 Coromon Guide: Evolution, Potential & Perfect Forms Explained

Evolution in Coromon

Evolution is the process where a Coromon transforms into a stronger form, gaining improved stats and a new appearance. Most Coromon have two or three evolutionary stages.

How Evolution Works

Level-Based Evolution : Most Coromon evolve upon reaching a specific level.

Special Condition Evolution : Some Coromon require specific conditions to evolve, such as using an item, a certain move, or triggering events during battle.

Examples:

- Swurmy → Beezel : Raise the Attack stat by 6 stages in one battle.
- Lunarwulf → Eclyptor : Use the Howl skill during the same turn as an opposing Lunarwulf.
- Purrgy → Ghinx : Feed Purrgy at least 9 Purrgy Nibbles before it reaches level 30.

Delaying Evolution & Trait Enhancement

When evolution is triggered, you can choose to accept or delay it.

- Delaying Evolution : Boosts the trait of the Coromon. Evolving later leads to a more enhanced trait.
- Trait Enhancement : Some traits receive single or even double enhancements based on how long you delay evolution.
- Devolve Pill : Allows manual devolving of Coromon, but without trait enhancement unless it's at the right level when evolving again.

Understanding Potential

Each Coromon has a hidden Potential Value (PV) from 1 to 21. This affects:

- How often the Coromon gains bonus stat points.
- Whether the Coromon has a color change (similar to shiny forms).

	Tier	Potential Value	Color Change	Rarity
Potential Tiers	Standard	1–16	No	Common
	Potent	17–20	Yes	Uncommon
	Perfect	21	Yes (unique palette)	Extremely Rare

- Standard : The most common, no color change.
- Potent : Rarer, unique coloration, better stat growth.
- Perfect : The rarest, max PV (21), and distinct appearance.

Gaining and Using Potential

As Coromon battle, they fill a blue Potential XP bar. Each time it fills, you can assign 3 bonus stat points to any stat.

- Perfect Coromon : Can gain up to 126 bonus points.
- Higher PV = more frequent stat boosts and better long-term stats.

Perfect Coromon Explained :

- Rarity :
  - Chance to encounter a Perfect Coromon is 1 in 3,194 (about 0.03%).
  - Potent Coromon are much more likely but still uncommon.
- How to Get a Perfect Coromon :
  - Potentiflator (Donar Island) :
    - Use this machine to upgrade a Coromon's Potential Value.
    - Costs 2,500 Gold per use.
    - If used on a PV 20 Coromon, it's guaranteed to become Perfect.
  - Potential Reader : Checks your Coromon's hidden PV.
  - Potent Scent : Increases the likelihood of encountering Potent or Perfect Coromon in the wild.
  - Battle Reader : Reveals PV of wild Coromon during battle (if they're Potent or higher).
