WEAPON SELLING

Each basic weapon part—Sword, Shield, and Crossbow—sells for 5 ki each, and a Rune sells for 20 ki.

If you sell them separately:

$5 + 5 + 5 + 20 = 35$ ki.

But when you craft them into a Rune Weapon (like a Rune Hammer, Rune Crossbow, or Big Sword)... the sell value becomes 55 ki.

That's an extra +20 ki profit just from crafting.

So instead of selling the parts individually, craft the weapon first—then sell for maximum value.

$$5 + 5 + 5 + 20 = 35 \text{ ki}$$
